

Commercial & Industrial Heat Pump Energy Optimization Rebate Tiers

For Retrofit Projects Totaling Greater Than 30 Tons

Heat pump energy optimization projects totaling more than 30 tons for Eversource or more than 10 tons or \$25,000 for United Illuminating require pre-approval. Projects totaling greater than 30 tons per customer building, per year, are eligible for a tiered rebate structure that gradually decreases as the project size increases. Rebate amounts will be calculated based on the tiers below.

Rebate Tiers

Equipment	Rebate Amount
Air Source Heat Pumps	<p>Up to 30 tons: \$2,000 per ton</p> <p>> 30 tons -100 tons: \$1,500 per ton</p> <p>> 101-150 tons: \$1,000 per ton</p> <p>> 150 tons will be evaluated for a custom incentive</p>
Variable Refrigerant Flow (VRF) Heat Pumps	<p>Up to 30 tons: \$3,000 per ton</p> <p>> 30 tons - 100 tons: \$2,500 per ton</p> <p>> 101-150 tons: \$2,000 per ton</p> <p>> 150 tons will be evaluated for a custom incentive</p>
Example	<p><u>102 ton VRF project rebate:</u></p> <p>30 tons x \$3,000 = \$90,000</p> <p>70 tons x \$2,500 = \$175,000</p> <p>2 tons x \$2,000 = \$4,000</p> <p>Total = \$269,000</p>

For more information, including rebate terms and conditions, see the [2023 Commercial Heat Pump Energy Optimization Rebate Form](#).
